![iThenticate]

Publish with confidence

Lower the risk of retraction and protect your reputation

iThenticate is the premier tool used by researchers throughout the writing process to check their high-stakes written work for potential misconduct issues such as AI-generated content and plagiarism. iThenticate helps avoid reputational damage whilst ensuring peace of mind.

> "You can never be too certain that even at the highest level you are always getting original content. iThenticate has provided the kind of safety net that we were looking for."

E. Kissel,
University Corporation of Atmospheric Research (UCAR)

For more information about how iThenticate can help you publish with confidence, visit turnitin.com/products/ithenticate

1 Integrated AI-writing detection

Address emerging research integrity threats by identifying potential AI-written text in submissions.

2 Comprehensive similarity matching

Compare against an unparalleled content database including premium scholarly publications, automatically exclude pre-prints and other repetitive industry-specific sections that aren't plagiarism, investigate text manipulation cases.

3 Easy collaboration with co-authors

Share folders with users and user groups to improve efficiency of the collaborative research work.

4 World standard data security

Your data is reliably stored in the world's safest data centers (Amazon Web Services).

5 User-friendly, accessible design

Intuitive, user-friendly design optimized for readability and simplicity, and compliant with the latest global standards.
